Career Overview

- Passionate data analyst who loves learning and solving problems with data.
- Completed the Google Data Analyst course and self-learned through the internet and YouTube, applying skills to data analysis projects using SQL, Python, and business intelligence.
- Faced many challenges but never gave up—now ready to apply my skills in a real-world organization and keep growing as a data professional.

Specialized Studies

- Data Integrity
- Requirement Gathering
- Business Impact Analysis
- Database Management
- Data Visualization
- Data Manipulation
- Data Mining
- Problem-Solving

Experience

Accenture   **Feb 2025 – Feb 2025**

Data Analyst Intern   *Bengaluru, Karnataka*

- Completed a simulation focused on advising a hypothetical social media client as a Data Analyst at Accenture.
- Cleaned, modelled and analyzed 7 datasets to uncover insights into content trends to inform strategic decisions.
- Prepared a PowerPoint deck and video presentation to communicate key insights for the client and internal stakeholders.

Good Business Lab   **Oct 2023 – June 2024**

Data Collector   *Bengaluru, karnataka*

- Collected and organized research data, ensuring accuracy and consistency in field data collection.
- Conducted quality checks to maintain high data integrity and reliability for research analysis.
- Collaborated with researchers to follow standardized data collection protocols and improve efficiency.

Freelance Projects

Customer Churn Analysis | *Python, Pandas, Matplotlib, Seaborn*   Link-🔗 | **Feb 2025**

- Overcame data challenges like missing values, duplicates, and incorrect formats to ensure accurate analysis.
- Used Python (Pandas, Seaborn, Matplotlib) to clean, visualize, and understand customer churn trends.
- Successfully derived insights to identify churn patterns, helping in better decision-making.

Ecommerce Data Analysis | *Python, SQL*   Link-🔗 | **Jan 2025**

- Connected MySQL with Python to manage and analyze large eCommerce datasets efficiently, ensuring seamless data handling and storage.
- Automated data extraction and transformation from multiple CSV files into a structured SQL database, improving data accessibility and accuracy.
- Used Pandas and SQL queries to generate insights on customers, orders, and payments for business decisions, helping optimize sales and customer retention strategies.

Super Store Sales Data Analysis | *Excel, Power BI, Power Query*   Link-🔗 | **Dec 2024**

- Cleaned and structured sales data in Excel to ensure accuracy and better analysis.
- Designed an interactive Power BI dashboard to visualize sales, profits, and customer trends.
- Analyzed regional and category-wise sales performance to identify key business opportunities and improve decision-making.

Technical Skills

Languages: Python, SQL
Analytical Tools: Excel, Power BI, Tableau, Power Query, Looker
Technologies/Frameworks: GitHub, Pandas, NumPy

Education

Mandya University   **2020 – 2023**

Bachelor of Commerce   *Mandya, Karnataka*
